5 Step Manual Dishwashing Procedure

1) Prewash
2) Wash
3) Rinse
4) Sanitize
5) Air Dry

Types of Sanitizers:

- Chlorine Solution: 50-100 ppm
- Quaternary Ammonium Compound Solution: 200 ppm
- Anionic Acid Solution: 200 ppm
- Iodine Solution: 25 ppm

Sanitizing Solutions must be maintained at an effective level. Verify effective concentration stated by the manufacturer.

*Each sanitizer type requires a corresponding test kit.
