

# Private Well Water Testing:

## *When should it be done?*

Annually for bacteria

If you notice a change in color, taste, odor, or appearance

If your well was exposed to floodwaters

If you have maintenance done on your well

If you have a new baby in (or routinely visiting) the home

## *Where can I get my water sampled?*

In addition to the [Health Department](#), water testing services are offered in four locations within a 50 mile radius of Wausau.
